Allowable Subject Matter

1. Claims 1-8 and 30-33 are allowed. The following is an examiner's statement of reasons for allowance: In interpreting the claims, in light of the specification, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.
2. **Bradley et al. (2005/0027871)** teaches Systems and methods are described for performing policy-managed, peer-to-peer service orchestration in a manner that supports the formation of self-organizing service networks that enable rich media experiences. In one embodiment, services are distributed across peer-to-peer communicating nodes, and each node provides message routing and orchestration using a message pump and workflow collator. Distributed policy management of service interfaces helps to provide trust and security, supporting commercial exchange of value. Peer-to-peer messaging and workflow collation allow services to be dynamically created from a heterogeneous set of primitive services. The shared resources are services of many different types, using different service interface bindings beyond those typically supported in a web service deployments built on UDDI, SOAP, and WSDL. In a preferred embodiment, a media services framework is provided that enables nodes to find one another, interact, exchange value, and cooperate across tiers of networks from WANS to PANS (**Bradley, abstract, figure 3 and corresponding text**).
3. However, the prior art of record fail to teach or suggest individually or in combination the claimed limitations of independent claims, a second content server configured to receive a request for a second content and to provide a second rights

statement and the second content according to a second digital rights management protocol, correlating to page 7, paragraph 26 of applicant's specification which states, "Turning now to Figure 2, a DRM integrated access system 50 is depicted. The present disclosure may employ multiple license servers, such as a first license server and a second license server, where for example, the first license server may be the ODRL license server 14 and the second license server may be the XrML license server 20. It will be appreciated however that the other types and/or combinations of license servers may be used as well. A translation server 52, which may also be referred to as a mediation component, is in communication with the ODRL client 12, the ODRL license server 14, the ODRL content server 16, the XrML client 18, the XrML license server 20, and the XrML content server 22."

4. These limitations, in conjunction with the other limitations in the independent claims 1 and 30 are not specifically disclosed or remotely suggested in the prior art of record. Therefore, claims 1-8 and 30-33 are allowed.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ranodhi Serrao whose telephone number is (571) 272-7967. The examiner can normally be reached on 8:00-4:30pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (571) 272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
